Professional Summary

Full-Stack / Backend Developer with hands-on experience across Java/Spring Boot and Node.js/Express backends, and React.js frontends. Has independently owned backend and frontend modules across production engagements – REST APIs, authentication, database design, and role-based access systems – with measurable improvements in performance and delivery speed.

Technical Skills

Languages: Java, JavaScript (ES6+), SQL, TypeScript

Backend: Spring Boot, Hibernate, Servlets, JDBC, REST APIs, Node.js, Express.js

Frontend: React.js, HTML5, CSS3, Component Architecture, API Integration

Databases: MySQL, PostgreSQL

DevTools: Git, GitHub, Redis, Postman, VS Code, Eclipse

AI & Automation: Prompt Engineering, n8n, Claude/Anthropic Tooling

Experience

Web Developer Trainee Intern – Routa Digital India

Duration: Jun 2026 – Present | *Role:* Full-Stack Developer | *Environment:* Node.js, Express.js, TypeScript, PostgreSQL, MySQL, React.js

- **Phishing Simulation & Security-Awareness Training Platform**
 - Built 5+ production React components – analytics dashboards, reporting panels, and user management modules – integrated with 25+ REST APIs across 8+ backend modules.
 - Cut UI development time by around 25% and bug turnaround time by about 20%, through consistent component reuse and code reviews with a 6-member Agile team.
 - Owned backend development – customizable campaign templates, click/response tracking, reporting endpoints, and role-based access control for admins vs. employees.
 - Deployed and currently live in production.
- **WorkSync (Jira-style internal tool):** Building the backend for sprint boards, task workflows, and status-tracking logic, along with role-based permission structures to control access across team roles. In progress.

Java Full Stack Development Intern – JSpider

Duration: Sept 2024 – Feb 2025 | *Role:* Backend Developer | *Environment:* Spring Boot, Hibernate, MySQL

- Built 15+ REST API endpoints with Spring Boot and Hibernate across two production-grade web applications.
- Optimized SQL queries and indexing strategy, bringing query response time down by roughly 30%.
- Owned backend development end-to-end – schema design through business logic – across 3+ relational schemas, with validation and transaction handling for data consistency.

Personal Projects

Virtual Restaurant (VR)

Duration: 2026 | *Role:* Full-Stack Developer | *Environment:* Java, Spring Boot, React, MySQL, Redis, WebSockets

- Independently designed and built a multi-tenant restaurant platform – QR ordering, kitchen display system (KDS), billing, and analytics – supporting 8 user roles.
- Implemented JWT authentication, refresh-token rotation, and tenant-level authorization for secure multi-tenant access.
- Added Redis caching, JPA query tuning, and database indexing, cutting API response time by about 45%; built real-time order sync (sub-100ms) using SockJS/STOMP WebSockets, with Flyway managing schema migrations.
- Code: github.com/PRAVEENPANDEY7/VR

Guruji AI – Intelligent Student Support Chatbot

Duration: 2024 | *Role:* AI / Automation Developer | *Environment:* NLP, n8n, Prompt Engineering

- Conceptualized and built an NLP-based student support chatbot, independently designing the conversation flow and intent-handling logic.
- Achieved 85%+ intent accuracy across 50+ query types; demoed at the AI Agents Hackathon, MNNIT Prayagraj, outperforming 3 competing teams.
- Designed 12+ multi-step conversational workflows using n8n and prompt engineering, cutting average query resolution time from about 10 minutes to under 30 seconds.
- Independently designed and built multiple landing pages and portfolio sites using AI-assisted development (Claude/prompt engineering tooling), handling layout, styling, and deployment end-to-end.

Education

Prayag Institute of Technology & Management, AKTU University

B.Tech – Computer Science Engineering

Mangala Prasad Inter College, UP Board

Senior Secondary & Secondary School

CGPA: 7.74 / 10

Aug 2022 – Aug 2026

82% (12th) – 78% (10th)

2018 – 2021

Certifications & Achievements

Building with the Claude API (Anthropic) – plus additional Anthropic certifications (Claude Code, Claude Platform, MCP, Cowork) Software Testing Concepts, Prompt Engineering for IT Teams (Professional)

AI Agents Hackathon – MNNIT Prayagraj | Advanced MDP – MNNIT Prayagraj
